Projects

my-portfolio

Personal Portfolio Website

A modern personal portfolio website built with Next.js and Tailwind CSS to showcase projects, technical skills, and development experience.

Key Features:

- Developed using Next.js for improved performance and SEO
- Implemented Dark Mode and Light Mode theme switching
- Designed responsive layouts for desktop, tablet, and mobile devices • Built modern user interfaces with Tailwind CSS

- Added subtle animations and interactive UI elements to enhance user experience
- Showcased personal projects and technical skills in a clean and professional design

Technologies: Next.js, React.js, Tailwind CSS, JavaScript

Task management

Task Manager is a task management application developed with React, React Query, and Supabase, focusing on efficient data handling and high-performance user experience.

Key Features:

- Implemented full CRUD operations for task management
- Integrated Supabase as the backend service and database
- Managed server state using React Query
- Leveraged React Query caching to reduce unnecessary API requests and improve application performance
- Built reusable and maintainable React components
- Developed responsive user interfaces for different screen sizes

Technologies: React.js, React Query, Supabase, REST API, CSS

world wise

WorldWide is a Single Page Application (SPA) built with React and React Router that allows users to track and manage cities they have visited around the world.

Key Features:

- Implemented client-side routing using React Router
- Built as a Single Page Application (SPA)
- Managed application state using React Context and useContext
- Integrated JSON Server for mock backend data storage
- Implemented interactive map functionality for selecting cities and locations
- Enabled users to add and manage visited cities through map interactions
- Developed responsive layouts and reusable React components

Technologies: React.js, React Router, Context API, useReducer, JSON Server, CSS

React Quiz

React Quiz is an interactive quiz application built with React, focusing on state management and user interaction.

Key Features:

- Implemented quiz logic using useReducer for complex state management
- Managed application state with Context API
- Added timer functionality for quiz sessions
- Developed score tracking and progress monitoring features
- Implemented question navigation and answer validation
- Built reusable and maintainable React components

Technologies: React.js, Context API, useReducer, CSS
