Piano Coffee – Full-Stack Coffee Shop Platform,

Full-Stack Developer | Next.js, Supabase, Tailwind CSS

06/2026 – 07/2026

items with a modern and responsive user interface.

The project includes a secure authentication system, a protected admin dashboard, and a complete CRUD system for product management. Implemented dynamic product filtering, reusable components, and optimized data fetching using Next.js App Router and API routes.

Key Features:

- Secure authentication with Supabase Auth
- Admin dashboard with full product management (Create, Read, Update, Delete)
- Dynamic client-side product filtering
- Responsive UI with Tailwind CSS
- Reusable component-based architecture
- Clean separation between frontend and backend logic
- Optimized performance using Next.js best practices

Tech Stack: Next.js, React, Supabase, Tailwind CSS, Next.js API Routes

world wise [↗](#)

WorldWise is a Single Page Application (SPA) built with React and React Router that allows users to track and manage cities they have visited around the world.

Key Features:

- Implemented client-side routing using React Router
- Built as a Single Page Application (SPA)
- Managed application state using React Context and useReducer
- Integrated JSON Server for mock backend data storage
- Implemented interactive map functionality for selecting cities and locations
- Enabled users to add and manage visited cities through map interactions
- Developed responsive layouts and reusable React components

Technologies: React.js, React Router, Context API, useReducer, JSON Server, CSS

React Quiz

React Quiz is an interactive quiz application built with React, focusing on state management and user interaction.

Key Features:

- Implemented quiz logic using useReducer for complex state management
- Managed application state with Context API
- Added timer functionality for quiz sessions
- Developed score tracking and progress monitoring features
- Implemented question navigation and answer validation
- Built reusable and maintainable React components

Technologies: React.js, Context API, useReducer, CSS

Professional Experience

Freelance Front-End Developer
